

Moki Check

What do danger and safety signs look like?

The shape and colour of danger and safety signs have an important meaning. This is because they are a kind of early warning system that helps to identify dangers and notifications at an early stage. If you want to know what the geometrical shapes - circle, square, rectangle and triangle - and the corresponding colours mean, then memorise this overview.

	Shapes →	round	triangular	square/ rectangular	
↓ Colours					EXAMPLES
RED	Not allowed Round and red always means not allowed!		Danger	Fire protection	
YELLOW			Warning		
GREEN				Rescue (e.g. first aid)	
BLUE	Compulsory instruction Round and blue must always be followed			Notification (e.g. play street)
